

225GT Sticky Fox™

MEDIUM
Professional
GLUEBOARD ILT

The Gilbert® Sticky Fox™ out-catches competitors whether it's wall-mounted or mounted under-counter. It features stainless steel construction (guard door included), easy maintenance; and silent-capture at a low, stunless price. Now, with two glueboard trays.

Insect Attractant: Two F20T12BL350 (or equivalent) 20 watt lamps. Replace annually for continued performance.

Installation: Wall-mount with keyhole slots or mount under-counter with screws. Generally speaking, low positioning yields best results for any ILT against flies.

Electrical: Six foot, 3-wire grounded power cord. Standard 115v/60hz.

Maintenance: Stainless steel guard swings up for easy access to lamps and glueboard(s) for periodic cleaning or replacement. Two glueboard trays are standard.

Change glueboard(s) regularly, at least as often as local codes require.

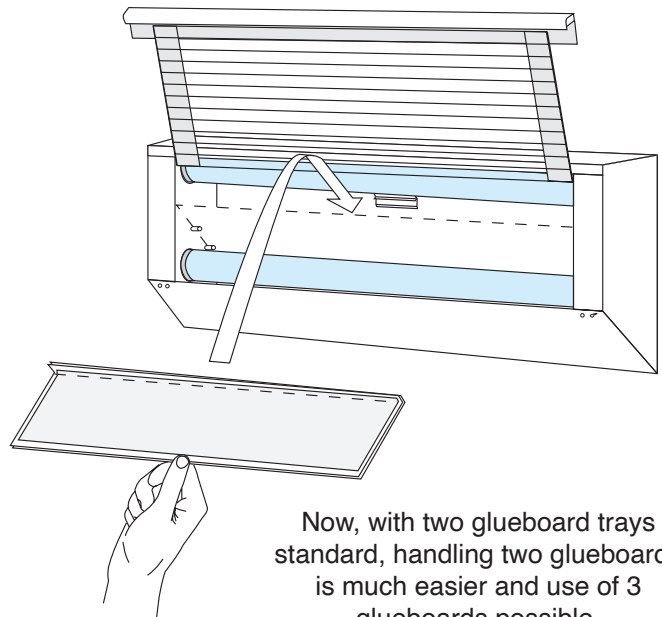

Construction Features: Stainless steel (Including guard door). Thin 3-5/8" wall-hugging profile.

ONE YEAR WARRANTY: (Excluding lamps and glueboards).

Dimensions: 27 3/4" x 11 3/8" x 3 5/8"
Weight: 12 lbs. **Ship Wt:** 17 lbs.

225GT Will Hold Three Large Glueboards.

Trap holds large (21-7/8" x 4-7/8") or standard (16-7/8" x 4-7/8")

Remember the 5/8" bend option to help retain insects and glue.

Now, with two glueboard trays standard, handling two glueboards is much easier and use of 3 glueboards possible.

Glueboard trays slip-in on pegs between lamps or in bottom of trap.

The third (optional) glueboard may be inserted into the clip (behind top lamp).

Gilbert® Manufacturing Plant

JONESBORO, AR, USA

Don Gilbert

Company Founder
Insect Light Trap Pioneer
(1923-1993)

Gilbert® has produced leading designs since Don Gilbert built the first, truly professional ILT in 1967. Gilbert® invented low mounting, corner mounting, multi-purpose portability, and superior catching ability.

Yet, it was not his trap designs, but his philosophy that was the true key to his success. Don's idea of ILTs, as only one tool in his bag, to be applied with a sincere desire to help customers in any way he could, was simple and honest. His efforts were so successful, Gilbert® was granted a registered trademark.

Don's son, David, now president, joined his father in 1981 and began applying what he knew of science to ILTs, picking his father's brain, doing his own research.

Gilbert® continues to offer the best in both glueboard and electrocuting ILTs and to lead the way away from gimmicks, toward true professionalism. Keep us informed of your experiences. Together, we will continue the fight for sincere, scientific use of professional ILTs.

All Gilbert® Professional ILTs are C-UL-US Listed and exceed all known codes - FDA, USDA, EPA, etc. We use only high quality component parts and warranty every Gilbert® trap.
