

# 601GT Sticky Lizard™

Professional  
GLUEBOARD  
FLYTRAP 

**The much anticipated, Gilbert® Sticky Lizard™ is here! Finally, a Gilbert® quality glueboard flytrap that corner-mounts, mounts flat on a wall (vertically or horizontally), and, when necessary, may even be hung from eyebolts. Call it unique and versatile.**

You can get your Lizard with or w/o wings (shown above and at right). These (optional) Lizard wings reduce effectiveness a bit, but hide glueboards (and captured insects) from view. A different concealment strategy, black glueboards, are also available.

The Sticky Lizard™ features Gilbert® F20T12BL350 (20 watt) insect attractant lamps. The standard is to replace lamps annually.

Six foot, 3-wire grounded power cord. Standard 115v/60hz.

Guard door swings open for easy access to lamps, lizard wings, and glueboard(s) for periodic cleaning / replacement. Change glueboard(s) regularly, at least as often as local codes require.

Constructed of Aluminized steel (lifetime auto muffler material). Nickel-chromed guard door.

ONE YEAR WARRANTY: (Excluding lamps and glueboards).

**Dimensions:** 30-1/4" x 16" x 3"  
**Weight:** 16 lbs. Ship wt. 22 lbs.

## OPTIONAL STICKY LIZARD WINGS Hide Glueboards & Caught Insects:

When vertical, glueboards either slip into standard clips on each side of lamps or are folded, placed into Lizard's wings, and held in place by gravity, guard door and latch. When horizontal, the primary glueboard slips into a Lizard wing or clip in the bottom of the trap. A second (optional) glueboard will slip into the clip above the lamps

Lizard Wing  
(w/glueboard  
inserted)

This trap holds one or two of our large (21-7/8" x 4-7/8") or standard (16-7/8" x 4-7/8") glueboard(s).
