

Excellent Effectiveness. The Night Hawk™ is the trap of choice for intercepting night-flying insects in most shipping, receiving, and warehouse areas, when the task cannot be accomplished with low, wall mounted traps. For the wildest of night-flier problems see Night Eagle™ (next page).

Sincere consideration should be given to the few ricochet insects and microparticles that fall from ceiling hung traps versus the myriad of whole, live insects allowed access to the most critical areas of your facility, if the traps are not there. Consider low traps first (see pg. 5).

Features two F40BL350 (or equivalent) 40 watt Insect attractant lamps. Replace annually for continued performance. Beautifully finished in anodized aluminum with double nickel-chromed guards that swing up for easy access to grid, reflective surfaces, and lamps for periodic cleaning and lamp replacement. Spring-locked catch tray is secure; yet, easily removed for emptying. Frame and interior structure made of aluminized steel (lifetime auto muffler material). Eyebolts included for ceiling hung installation (8-10 ft. high or 6 inches above product stacks). Six foot, 3-wire grounded power cord. Standard 115v/60hz. Interlock switch automatically shuts off trap when guard door is opened.

ONE YEAR WARRANTY (Excluding lamps only)!

Dimensions: 53 1/8" x 13 1/2" x 8 11/16"
Weight: 32 lbs. **Ship Wt:** 41 lbs.

Gilbert® Manufacturing Plant

JONESBORO, AR, USA

Don Gilbert

**Company Founder
Insect Light Trap Pioneer
(1923-1993)**

Gilbert® has produced leading designs since Don Gilbert built the first, truly professional ILT in 1967. Gilbert® invented low mounting, corner mounting, multi-purpose portability, and superior catching ability.

Yet, it was not his trap designs, but his philosophy that was the true key to his success. Don's idea of ILTs, as only one tool in his bag, to be applied with a sincere desire to help customers in any way he could, was simple and honest. His efforts were so successful, Gilbert® was granted a registered trademark.

Don's son, David, now president, joined his father in 1981 and began applying what he knew of science to ILTs, picking his father's brain, doing his own research.

Gilbert® continues to offer the best in both glueboard and electrocuting ILTs and to lead the way away from gimmicks, toward true professionalism. Keep us informed of your experiences. Together, we will continue the fight for sincere, scientific use of professional ILTs.

All Gilbert® Professional ILTs are C-UL-US Listed and exceed all known codes - FDA, USDA, EPA, etc. We use only high quality component parts and warranty every Gilbert® trap.
