

### 747GT Will Hold Four Large Glueboards.

Removable tray holds our large (21-7/8" x 4-7/8") or standard (16-7/8" x 4-7/8")

Glueboards for Touch-Free Maintenance.

Additional (optional) glueboards may be inserted into the clips (behind top lamp) to increase total glue area.

Gilbert® glueboards are scored for bending 5/8" edge. This is an optional feature to help retain glue and insects, especially when board is in vertical position.

The Gilbert® 747GT Sticky Bear™ is our largest, most powerful, glueboard light trap. It rivals the catching ability of a *Flying Lion™* (pg. 6).

**Insect Attractant:** Two standard Osram Sylvania F40/350BL (40 watt) lamps. Replace annually for continued performance.

**Installation:** Wall-mounted with keyhole slots. Low positioning almost always yields the best results for any ILT against flies. "Below 5 feet" is the general guideline. About 3 feet or waist high is effective and also easy to maintain.

**Electrical:** Six foot, 3-wire grounded power cord. Standard 115v/60 Hz. **Maintenance:** The Bear uses up to four glueboards. Spring-locked tray conceals glueboards, is secure, and yet easy to service. Nickel chrome guard swings up for easy access to lamps for cleaning and/or replacement. Change glueboards regularly, at least as often as codes require.

**Construction Features:** Frame and interior structure are aluminized steel for strength. Beautifully finished in anodized aluminum with nickel chrome guard. For **Stainless Steel version, order# 747GTSS.**

**FIVE YEAR WARRANTY** (Excluding lamps, glueboards).

**Dimensions:** 53 1/8" x 13 1/8" x 5 5/8"  
**Weight:** 23 lbs., **Ship Wt:** 30 lbs.
